PROFILE SUMMARY

BCA graduate with strong analytical and project execution skills gained through data analytics projects, **Deloitte and Tata Group virtual job simulations, and Microsoft/LinkedIn certifications**. Experienced in data collection, data quality analysis, reporting, dashboard creation, and delivering actionable insights using Jira, Excel, Power BI, SQL, and Python. Skilled in structured problem-solving, stakeholder communication, risk identification, and project tracking. Seeking opportunities in Project Management, Project Analyst, Reporting Analyst, Business Analyst environments where strong governance, reporting, and analytical capabilities are valued.

SKILLS

- **Business Analysis & Reporting:** Jira, Requirements Gathering, Business Process Analysis, Gap Analysis, KPI Reporting, Data-Driven Decision Making, Documentation, Software Development Life Cycle
- **Analytics & Visualization Tools:** Microsoft Excel (Advanced), Microsoft Power BI, Tableau, Microsoft Access, Google Analytics,
- **Data Analysis & Management:** Data Cleaning, Data Transformation, Data Visualization, Exploratory Data Analysis (EDA), ETL/ELT Processes, A/B Testing
- **Programming & Databases:** Python (Pandas, NumPy, Matplotlib, Scikit-learn, PySpark), SQL, PostgreSQL, Java
- **Data Management:** Data Cleaning, Data Transformation, EDA, ETL/ELT Processes, Data Visualization
- **Tools & Technologies:** Machine Learning (Basic), Artificial Intelligence (Basic), MERN Stack, RESTful APIs, Microsoft 365
- **Professional Skills:** Problem-Solving, Analytical Thinking, Stakeholder Communication, Teamwork, Time Management, Presentation Skills

EDUCATION

- **S.K.H.M.C Collage, Nandurbar, Maharashtra** 2022-2025
Bachelor of Computer Application (B.C.A) **CGPA: 8.81 (73%)**

PROJECT WORK

- ❖ **Supply Chain Data Analyst: (Python)**

❖ **GitHub:** <https://github.com/Anujkumar-27/Supply-Chain-Data-Analyst.git>

- Built a weekly demand-forecasting pipeline using Prophet to improve inventory planning and reduce stockouts.
 - Cleaned and transformed raw order data, engineered time-based features, and removed outliers for robust modeling.
 - Performed EDA and seasonality analysis to identify demand drivers and inform replenishment strategy.
 - Developed safety-stock and reorder-point calculations incorporating forecast uncertainty to optimize reorder timing.
 - Presented actionable dashboards and recommendations to stakeholders, aligning procurement with demand forecasts.

April 2026
- ❖ **Streaming Service Platform Data Analysis: (Microsoft Excel, Power BI)**

❖ **GitHub:** <https://github.com/Anujkumar-27/Streaming-Service-Platform-Analysis->

- Data Collection & Cleaning: Preparing movie data for analysis.
 - Exploratory Data Analysis (EDA): Identifying trends, patterns, and insights.
 - Visualization: Creating stunning charts and graphs to present findings.
 - Machine Learning (if applicable): Predictive modeling for personalized recommendations.
 - Insights & Conclusion: Key takeaways and actionable findings.

July 2025
- ❖ **Uber Rides Data Analysis: (Python)**

❖ **GitHub:** <https://github.com/Anujkumar-27/Uber-Rides-Data-Analysis-using-Python>

- Conducted exploratory data analysis on Uber ride data using Python to identify ride behavior patterns.
 - Discovered that business rides dominate overall usage, with peak demand during afternoon hours and weekdays.
 - Analysis showed most trips fall within 0–20 miles, particularly 4–5 miles.
 - Ride activity decreases significantly during winter months.
 - Utilized data visualization and feature engineering techniques to derive actionable insights

ADDITIONAL EXPERIENCE

- ❖ Virtual Job Simulation on Forage – [Deloitte](#) (June 2025) & [Tata Group](#) (June 2025)
 - Solved real-world business analytics challenges involving data cleaning, analysis, and visualization.
 - Developed structured approaches for extracting insights from complex datasets.
